

LED PAR 818 STUDIO

DESCRIPTION:

This light is recommended for use in a studio or recording environment where silent operation is essential. Natural convection cooling limits the output of the LEDs so this fixture uses 18* 4 in 1 (red blue green and white) 8 watt leds which give rise to millions of colours and dmx controlled effects. It is our PAR light of choice for our own studio environment.

FLICKER FREE OPERATION Many of the lower cost led fixtures will produce lines or 'flicker' on video footage as they are dimmed. This fixture uses high frequency PWM dimming to avoid

FEATURES AND SPECIFICATIONS

Input Voltage: AC 100V-264V/47-63Hz
Output Voltage: DC24V
Beam Angle: 25°, 45°, Optional
Anti-electricity Intension: 1.5KV
Insulation Resistance: >2MΩ
Size: 284x193x254mm
N.W: 5.0KG Certificate: CE, ROHS
Net Weight: 5.0KG
Size: 284x193x254mm
Power Consumption: 150W
Cooling Mode: Natural convection
Beam Angle: 25°, 45°, Optional
Anti-electricity Intension: 1.5KV
Insulation Resistance: >2MΩ
Size: 284x193x254mm
N.W: 5.0KG Certificate: CE, ROHS
Net Weight: 5.0KG
Size: 284x193x254mm
Power Consumption: 150W

PRICE PER UNIT \$490 inc. GST
